

SE-3 PATROLLER

Off-Board Battery Charger

SEGWAY®

SE-3 PATROLLER

Off-Board Battery Charger

Downtime is Averted, Patrols Continue and Presence is Preserved

When it's imperative that your SE-3 Patroller be up and running at all times, Segway's SE-3 off-board charger ensures that it is.

Plug the battery into the charger and the charger into any standard AC outlet to power up the battery so it's ready to be swapped into the unit whenever it's needed.

Downtime from charging is averted, patrols continue, presence is preserved and the public's safety is maintained.
